Software Developer with 3 years of experience.

Work Experience

Globo

Globo is the largest commercial TV network in Latin America and the second-largest commercial TV network in the world.
(more info: https://en.wikipedia.org/wiki/TV_Globo) Remote

Software Developer / November 2020 - Present

Developed innovative solutions that significantly reduced costs and streamlined processes, empowering clients to achieve greater productivity and profitability.

Delivered immense value to the company through the successful migration of a large-scale television broadcasting system from on-premises to modern Cloud-based solutions, enhancing scalability, flexibility, and operational efficiency.

Collaborated closely with fellow developers and actively engaged in daily Agile practices, ensuring the timely delivery of the project and maximizing its value to the company.

Provided valuable insights and ensured top-notch quality by conducting rigorous testing of new products of our partners, including Google.

Contributed throughout the entire development cycle, from conceptualization to implementation, testing, documentation, and maintenance of products and features, thereby adding substantial value to the company's portfolio.

TransPerfect

Vancouver, Canada

Data Analyst / January 2023

Skillfully identified and labeled the purpose of transcribed content, enabling efficient categorization and retrieval of information, saving valuable time and improving data organization.

Expertly categorized provided data based on multiple criteria, facilitating easy access and analysis, resulting in enhanced decision-making processes and improved overall efficiency.

Produced impeccably accurate copies of live speeches and dictated audio, showcasing meticulous attention to detail and ensuring the reliability and integrity of the transcribed content.

Played a crucial role in a highly confidential project that involved sensitive data, demonstrating trustworthiness, discretion, and the ability to handle confidential information with the utmost professionalism.

Education

Associate's Degree in Systems Analysis and Development.

(UNESA Rio de Janeiro – 2019 to 2022.)

Volunteer Work

Texas Yes Project/ 2023

San Antonio, Texas

Enthusiastically interacted with attendees, initiating conversations about the collectible items available for sale. Helped spark interest and engage potential buyers. Answered questions and provided recommendations.

Kept track of inventory levels, regularly restocking the booth to ensure that popular collectible items were readily available. By monitoring sales trends and customer preferences, helped optimize the inventory selection to meet the demand.

Rick's Heart Foundation/ 2022

Surrey, BC

Revamped the foundation's website by designing and implementing visually appealing interfaces for key pages, incorporating industry-leading UI methodologies and principles. This enhanced user experience and engagement, attracting more visitors and promoting the foundation's mission effectively.
